ABOUT US

MPPTech GmbH is a registered and ISO-certificated company. Our core business is the mechanical and electrical revitalization and modernization of steam turbine units, and we provide professional engineering, manufacturing, installation, maintenance, troubleshooting and repair services in Europe and Asia.

MPPTech GmbH was founded in Austria in 1998 with just three staff. We grew very rapidly to our current workforce of more than 20 skilled, experienced and highly specialized staff. With our international team, we can tailor our services to the needs of customers in different regions and comply with both domestic and international standards.

We enjoy close working relationships with turbine manufacturers, enabling us to offer efficient, effective and reliable solutions to problems with turbines of any kind and any power range.

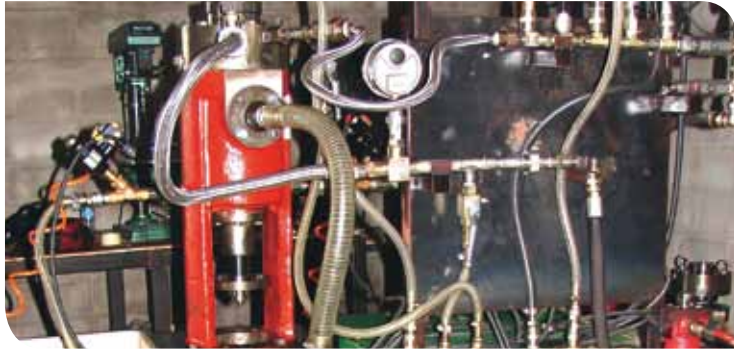

At **MPPTech** GmbH, we pride ourselves on our highly professional operation. We are committed to keeping our customers satisfied and to ensuring that projects are completed on budget and on time. Our partnership with our clients and suppliers is the key to meeting our prime objective - working together to achieve shared goals. And it goes without saying that all our activities have safety and security as their number one priority!

OUR ACTIVITIES

Our activities include the construction and installation of new turbine systems, refurbishment and modernization of existing systems, repairs, overhauls and recommissioning, engineering and design, and the supply of components.

REFURBISHMENT AND MODERNIZATION

Mechanical

- Maintaining rotating equipment on powerhouse
- Improving control oil system
- Upgrading mechanical and hydraulic controls to digital control systems

Electrical

- Converting exciter machine from brush commutator to brushless exciter
- Modernizing turbine and excitation systems
- Modernizing generator excitation systems and turbine control systems
- Modernizing all types of excitation system to digital control
- Replacing analog turbine control systems with fully-digital control systems
- Refurbishing turbine/generator sets and control rooms

MAJOR OVERHAUL AND REPAIR PROJECTS AND COMMISSIONING

- Carrying out overhauls and repair work on all kind of steam turbine
- Troubleshooting on all brands of turbine and control equipment

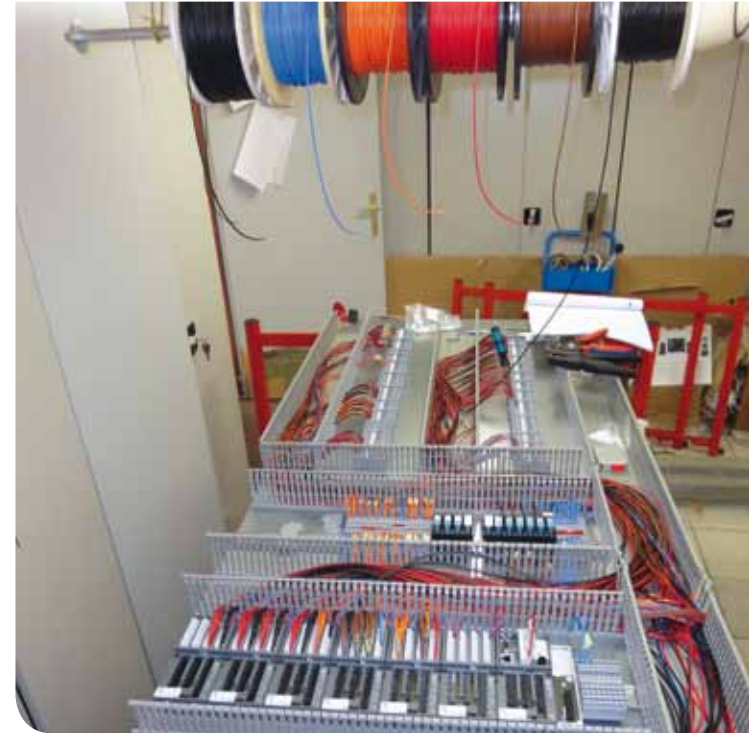

CONTROL EQUIPMENT

MPP Tech GmbH specializes in retrofitting turbine controllers and excitation systems.

- Designing and manufacturing of control systems
- Modernizing control systems
- Improving control oil systems
- Reconditioning control systems
- Customized solutions
- Adapting design to customer requirements

Whatever your needs or requirements, **MPP**Tech GmbH has a solution!
Contact us for our catalogue MPP CONTROL EQUIPMENT.

SUPPLY OF SPARE PARTS

- Supplying all special parts for power plants with certification to deadlines and in compliance with the latest technical standards

SOLE DISTRIBUTORSHIP FOR

- Persta valves
- FEY lamination rings
- Steam turbines brand General Turbo

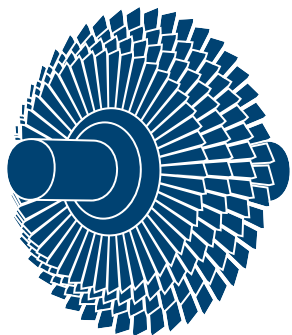

NEW TURBINES

We can supply, build and commission brand-new steam turbines from our European contractor. Our after-sales service includes troubleshooting, major overhaul, and the supply and installation of parts.
